1 Introduction

This guide provides information on the restrictions required for customizing HTML pages used by IceWall SSO.

The HTML files described in this document are the standard HTML files provided with IceWall SSO 10.0 or higher.

1.1 Version designations in the text

The table below gives the meanings of the version designations added to the text.

Designation	Meaning
10.0	An item added with the version enclosed in the square. In this case, the designation indicates the item was added with 10.0.
10.0	An item where the specification was changed or function added with the version enclosed in the oval. In this case, the designation indicates a specification change or added function with 10.0.

1.2 List of HTML files provided with IceWall SSO

(1) User authentication pages

Page name	File name
Login page	login.html
Client Certificate Login page	login_cert.html
Pre-Authenticated Error page	login_cert_error.html
Certificate Serial Number Error page	login_error.html
Forced Login page	login_force.html
No Group Error page	login_group_error.html
Login Limit Error page	login_limit_error.html
Account Lock Error page	login_lock_error.html
Login send time restriction error page	login_postlimit_error.html
Password Error page	login_pwd_error.html
Login Stop Error page	login_stop.html
User ID Error page	login_userid_error.html

(2) Access privileges pages

Page name	File name
Access Privileges Error page	access_error.html
Data Send Error page	datasend_error.html
Request filter error page 10.0	filter_request_error.html
Request ACL error page 10.0	request_acl_error.html

(3) POST data inheritance pages

Page name	File name
POST data maximum size error page	max_postsize_err.html

(4) Logout pages

Page name	File name
Logout page	logout.html
Logout Error page	logout_error.html
Logout Failed page	logout_no.html
Logout Successful page	logout_ok.html

(5) Password change pages

Page name	File name
Password Change page ⑩.①	pwdchg.html
Password Change Error page ⑩.①	pwdchg_err.html
No Login Error page ⑩.①	pwdchg_nologin.html
Password Change Success page ⑩.①	pwdchg_ok.html
Current Password Entry Error page ⑩.①	pwdchg_oldpasserr.html
Password Policy Error page ⑩.①	pwdchg_policy_err.html
Password change send time restriction error page ⑩.①	pwdchg_postlimit_err.html
Password Change Prohibited Error page ⑩.①	pwdchg_pvwioerr.html
New Password Error page ⑩.①	pwdchg_repasserr.html
Password Expiration Warning page ⑩.①	pwdchg_warning.html

(6) Cross site scripting policy pages

Page name	File name
GET Filter Error page	filter_get_error.html
POST Filter Error page	filter_post_error.html
HTML Filter Error page	filter_html_error.html
HOST Filter Error page	filter_svr_error.html

(7) System pages

Page name	File name
Undefined Alias Error page	system_alias_error.html
Backend Web Server Down Error page	system_backend_error.html
Authentication Module Down Error page	system_certd_error.html
System Error page	system_error.html

Page name	File name
Authentication DB Down Error page	system_ldap_error.html
Alias Unspecified Error page	system_server_error.html
Backend Web Server Timeout Error page	system_timeout_bkend.html
Authentication Module Timeout Error page	system_timeout_certd.html
Database busy error page 10.0	system_busy_database.html
User-Defined Error page 1	usr_ext1.html
User-Defined Error page 2	usr_ext2.html
User-Defined Error page 3	usr_ext3.html
User-Defined Error page 4	usr_ext4.html
User-Defined Error page 5	usr_ext5.html
User-Defined Error page 6	usr_ext6.html

HTML files for Forwarder are located in the /opt/icewall-ss0/dfw/html directory.

In IceWall SSO, you can configure the system to use specific HTML pages by linking parameters with particular purposes to the HTML files listed above. These parameters are set in /opt/icewall-ss0/dfw/cgi-bin/html.conf.

1.3 Using IceWall SSO on a handheld device

The initial state of the HTML documents has been configured under the assumption that they will be used by a web browser installed on a PC.

To use IceWall SSO on an handheld device, HTML documents coded with only the minimum required elements have been prepared. You can use the HTML documents for handheld devices by editing the DOCS parameter in the Forwarder configuration file (dfw.conf) as shown below.

`DOCS=/opt/icewall-ss0/dfw/cgi-bin/chtml.conf`

The HTML documents for handheld devices are based on "i-mode compatible HTML version 1.0" from NTT DOCOMO.

Customize the HTML documents to the content standard supported by the carrier for the handheld devices that will be used.

1.4 Notice

The following chapters describe each of the standard HTML files provided with IceWall SSO.

In this document, reference information for each HTML file consists of a screen image, the HTML source code, and a description.

The reserved variables (specific keywords) used in IceWall SSO have unique names and are used when HTML files are converted by Forwarder. There are other variables that pass data from an HTML page to IceWall SSO, and these variables

also have unique names. In the source code section of the description for the HTML files, those variables are enclosed by a rectangle. If you are going to customize HTML files, please pay special attention to those variable names when editing HTML files.

The style sheet definition given below is included within the <HEAD> tags for each HTML file, but the definition is omitted from the source code sections of this document.

```
<style type="text/css">
<!--
BODY, TD {
    font-family: Verdana, Arial, Helvetica, Sans-serif;
    font-size: 12px;
}
a:hover {
    color: #ff3300;
    text-decoration: underline;
}
.title {
    font-size: 18px;
    font-family: Verdana, Arial, Helvetica, Sans-serif;
}
.sub-title {
    font-size: 16px;
    font-family: Verdana, Arial, Helvetica, Sans-serif;
    line-height: 18px;
}
.sub-title2 {
    font-size: 14px;
    font-family: Verdana, Arial, Helvetica, Sans-serif;
}
.footer {
    font-size: 11px;
    font-family: Verdana, Arial, Helvetica, Sans-serif;
}
-->
</style>
```

1.5 Image files

Some image files are used in the standard HTML pages. The following image files are used.

File Name	Intended use
arrow.gif	The arrow symbol indicating a link to the relogin page
arrow2.gif	The arrow symbol indicating a link to the previous page if an error occurs during a password change
curve_b.gif	The rounded corner at the top left of a dialog box (blue) within a page

File Name	Intended use
curve_r.gif	The rounded corner at the top left of a dialog box (red) within a page
error.gif	“ERROR” message displayed when an error occurs
footer.gif	The company name at the bottom of the page
header.gif	The product name at the top of the page
title_b.gif	The product name in a dialog box (blue) within a page
title_r.gif	The product name in a dialog box (red) within a page

* These files are stored in the /opt/icewall-ss0/dfw/html/image directory.

2 User Authentication Pages

2.1 Login page (login.html)

This page is displayed during a normal login.

Screen image	HTML source
	<pre><!-- \$Workfile: login.html \$ \$Revision: 5 \$ \$Date: 10/06/18 10:32 \$ --> <html> <head> <title>IceWall SSO - Login</title> <meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1"> <meta http-equiv="Pragma" content="no-cache"> </head> <body bgcolor="#006699" text="#000000" link="#336699" alink="#ff3300" topmargin="0" marginheight="0"> <center> <table border="0" width="80%" height="92%" bgcolor="#ffffff" cellpadding="0" cellspacing="0"> <tr> <td height="28"> <table border="0" height="28" cellpadding="5" cellspacing="0" width="100%"> <tr> <td bgcolor="#99ccff" class="sub-title">IceWall SSO</td> </tr> </table> </td> </tr> <tr> <td height="100%" align="center"> <table border="0" width="400" cellpadding="0" cellspacing="0"> <tr> <td bgcolor="#333333"> <table border="0" width="400" cellpadding="3" cellspacing="1"> <tr> <td height="30" bgcolor="#3399cc" class="title">IceWall SSO</td> </tr> <tr> <td height="200" bgcolor="#ffffff" align="center"> <div class="sub-title">- Login -</div> <p>Enter your UserID and Password, then press "Submit" button.</pre>

	<pre><form method="POST" name="form" action="\$DFW"> <table border="0" cellpadding="3" cellspacing="0"> <tr> <td nowrap>*&nbsp;User ID</td> <td><input type="text" name="ACCOUNTUID"></td> </tr> <tr> <td nowrap>*&nbsp;Password</td> <td><input type="password" name="PASSWORD"></td> </tr> </table>
 <input type="hidden" name="HIDEURL" value="\$HIDEURL"> <input type="hidden" name="LOGIN" value="\$KEY_LOGIN"> <input type="hidden" name="LIMIT" value="\$POST_LIMIT"> <input type="submit" name="SUBMIT" value=" Submit "> <input type="reset" value=" Reset "> </form> </td> </tr> </table> </td> </tr> </table> </td> </tr> <tr> <td height="15"> <table border="0" width="100%" height="15" cellpadding="3" cellspacing="0"> <tr> <td bgcolor="#99ccff" class="footer">Hewlett-Packard</td> </tr> </table> </td> </tr> </table> </center> </body> </html></pre>

2.2 Client Certificate Login page (login_cert.html)

This login page is displayed when the web server requests a client certificate for login and asks the user to use the certificate to log into IceWall SSO. Forwarder automatically retrieves the user ID from the client certificate.

Screen image	HTML source
	<pre> <!-- \$Workfile: login_cert.html \$ \$Revision: 2 \$ \$Date: 09/04/08 13:52 \$ --> <html> <head> <title>IceWall SSO - Login</title> <meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1"> <meta http-equiv="Pragma" content="no-cache"> </head> <body bgcolor="#006699" text="#000000" link="#336699" alink="#ff3300" topmargin="0" marginheight="0"> <center> <table border="0" width="80%" height="92%" bgcolor="#ffffff" cellpadding="0" cellspacing="0"> <tr> <td height="28"> <table border="0" height="28" cellpadding="5" cellspacing="0" width="100%"> <tr> <td bgcolor="#99ccff" class="sub-title">IceWall SSO</td> </tr> </table> </td> </tr> <tr> <td height="100%" align="center"> <table border="0" width="400" cellpadding="0" cellspacing="0"> <tr> <td bgcolor="#333333"> <table border="0" width="400" cellpadding="3" cellspacing="1"> <tr> <td height="30" bgcolor="#3399cc" class="title">IceWall SSO</td> </tr> <tr> <td height="200" bgcolor="#ffffff" align="center"> <div class="sub-title">- Login -</div> <p> [USER_ID] Enter your password and press "Submit" button.
 </pre>

Screen image	HTML source
	<pre><form method="POST" name="form" action="\$DFW"> <table border="0" cellpadding="3" cellspacing="0"> <tr> <td nowrap>*&nbsp;Password</td> <td><input type="password" name="PASSWORD"></td> </tr> </table>
 <input type="hidden" name="HIDEURL" value="\$HIDEURL"> <input type="hidden" name="LOGIN" value="\$KEY_LOGIN"> <input type="hidden" name="LIMIT" value="\$POST_LIMIT"> <input type="submit" name="SUBMIT" value=" Submit "> <input type="reset" value=" Reset "> </form> </td> </tr> </table> </td> </tr> <tr> <td height="15"> <table border="0" width="100%" height="15" cellpadding="3" cellspacing="0"> <tr> <td bgcolor="#99ccff" class="footer">Hewlett-Packard</td> </tr> </table> </td> </tr> </table> </center> </body> </html></pre>

2.3 Pre-authenticated Error page (login_cert_error.html)

This page is displayed when a user with a client certificate attempts to log in by user ID authentication. You can configure the Authentication Module so as to allow or disallow user ID authentication for users with the certificate.

Screen image	HTML source
	<pre> <!-- \$Workfile: login_cert_error.html \$ \$Revision: 6 \$ \$Date: 02/08/27 16:28 \$ --> <html> <head> <title>IceWall SSO - Authentication Error</title> <meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1"> <meta http-equiv="Pragma" content="no-cache"> </head> <body bgcolor="#006699" text="#000000" link="#336699" alink="#ff3300" topmargin="0" marginheight="0"> <center> <table border="0" width="80%" height="92%" bgcolor="#ffffff" cellpadding="0" cellspacing="0"> <tr> <td height="28" align="center"> <table border="0" width="100%" height="28" cellpadding="1" cellspacing="0"> <tr> <td bgcolor="#99ccff"></td> </tr> </table> </td> </tr> <tr> <td height="100%" align="center"> <table border="0" width="420" cellpadding="0" cellspacing="0"> <tr bgcolor="#cc3333"> <td width="18" height="35"></td> <td width="175" height="35"></td> <td width="227" height="35" align="right">*&nbsp;</td> </tr> </table> <table border="0" width="420" cellpadding="0" cellspacing="0"> <tr> <td bgcolor="#666666"> <table border="0" width="420" cellpadding="3" cellspacing="1"> </pre>

Screen image	HTML source
	<pre><tr> <td height="180" bgcolor="#ffffff" align="center"> <div class="sub-title">- Must Login with a Client Certificate -</div>
 <p><div class="sub-title2">Your initial authentication has already been completed.</div> <p>&nbsp;Please try to login again. </td> </tr> </table> </td> </tr> </table> </td> </tr> <tr> <td height="15" align="center"> <table border="0" width="100%" height="15" cellpadding="1" cellspacing="0"> <tr> <td bgcolor="#99ccff"></td> </tr> </table> </td> </tr> </table> </center> </body> </html></pre>

2.4 Certificate Serial Number Error page (login_error.html)

This page is displayed when the client certificate serial number registered in the database used by the Authentication Module does not match the client certificate serial number retrieved from the web server.

Screen image	HTML source
	<pre> <!-- \$Workfile: login_error.html \$ \$Revision: 6 \$ \$Date: 02/08/27 16:28 \$ --> <html> <head> <title>IceWall SSO - Invalid Serial Number</title> <meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1"> <meta http-equiv="Pragma" content="no-cache"> </head> <body bgcolor="#006699" text="#000000" link="#336699" alink="#ff3300" topmargin="0" marginheight="0"> <center> <table border="0" width="80%" height="92%" bgcolor="#ffffff" cellpadding="0" cellspacing="0"> <tr> <td align="center" height="28"> <table border="0" width="100%" height="28" cellpadding="1" cellspacing="0"> <tr> <td bgcolor="#99ccff"></td> </tr> </table> </td> </tr> <tr> <td align="center" height="100%"> <table border="0" width="420" cellpadding="0" cellspacing="0"> <tr bgcolor="#cc3333"> <td width="18" height="35"></td> <td width="175" height="35"></td> <td width="227" height="35" align="right">*&nbsp;</td> </tr> </table> <table border="0" width="420" cellpadding="0" cellspacing="0"> <tr> <td bgcolor="#666666"> <table border="0" width="420" cellpadding="3" cellspacing="1"> </pre>

2.5 Forced Login page (login_force.html)

This page is displayed to ask a user whether to log in discarding the login access privileges of an existing user already logged in. This page is displayed if the Authentication Module disallows duplicate logins and forces an exclusive login function.

Screen image	HTML source
	<pre><!-- \$Workfile: login_force.html \$ \$Revision: 2 \$ \$Date: 09/04/08 13:52 \$ --> <html> <head> <title>IceWall SSO - Force Login</title> <meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1"> <meta http-equiv="Pragma" content="no-cache"> </head> <body bgcolor="#006699" text="#000000" link="#336699" alink="#ff3300" topmargin="0" marginheight="0"> <center> <table border="0" width="80%" height="92%" bgcolor="#ffffff" cellpadding="0" cellspacing="0"> <tr> <td height="28" align="center"> <table border="0" height="28" cellpadding="1" cellspacing="0" width="100%"> <tr> <td bgcolor="#99ccff"></td> </tr> </table> </td> </tr> <tr> <td height="100%" align="center"> <table border="0" width="420" cellpadding="0" cellspacing="0"> <tr bgcolor="#3399cc"> <td width="18" height="35"></td> <td width="175" height="35"></td> <td width="227" height="35" align="right">*&nbsp;</td> </tr> </table> <table border="0" width="420" cellpadding="0" cellspacing="0"> <tr> <td bgcolor="#666666"></pre>

Screen image	HTML source

2.6 No Group Error page (login_group_error.html)

This page is displayed when user information exists in the Authentication DB connected by the Authentication Module but that user is not defined by the group definition file (cert.grp) for the Authentication Module.

Screen image	HTML source
	<pre><!-- \$Workfile: login_group_error.html \$ \$Revision: 6 \$ \$Date: 02/08/27 16:28 \$ --> <html> <head> <title>IceWall SSO - No Group Error</title> <meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1"> <meta http-equiv="Pragma" content="no-cache"> </head> <body bgcolor="#006699" text="#000000" link="#336699" alink="#FF3300" topmargin="0" marginheight="0"> <center> <table border="0" width="80%" height="92%" bgcolor="#ffffff" cellpadding="0" cellspacing="0"> <tr> <td height="28" align="center"> <table border="0" width="100%" height="28" cellpadding="1" cellspacing="0"> <tr> <td bgcolor="#99ccff"></td> </tr> </table> </td> </tr> <tr> <td height="100%" align="center"> <table border="0" width="420" cellpadding="0" cellspacing="0"> <tr bgcolor="#cc3333"> <td width="18" height="35"></td> <td width="175" height="35"></td> <td width="227" height="35" align="right">*&nbsp;</td> </tr> </table> <table border="0" width="420" cellpadding="0" cellspacing="0"> <tr> <td bgcolor="#666666"> <table border="0" width="420" cellpadding="3" cellspacing="1"></pre>

2.7 Login Limit Error page (login_limit_error.html)

This page is displayed when a user tries to log in while the number of users logged in to the Authentication Module has reached the maximum limit.

Screen image	HTML source
